January 2003 • Volume 12 • Number 1

## Features

[Searching in Unusual Ways and Places](#) • Eleen Frisch

In contexts where grep can't be applied easily, Frisch turns to other tools (some open source, others vendor provided). This article looks at some of them.

[Solstice DiskSuite Soft Partitions — Not Hard At All](#) • Matthew Cheek

Cheek introduces DiskSuite Soft Partitions, a new feature that greatly extends the capabilities of the DiskSuite storage management product.

[Improving SSH with Keychain](#) • Todd A. Jacobs

Jacobs shows how keychain can simplify key management by allowing a user to use a single authentication agent across virtual consoles and through multiple logins.

[Highlighting Linux Command Prompts with the PROMPT\\_COMMAND Variable](#) • Kirk Becker

Becker describes how to implement a colored command prompt that shows which terminal is visible and makes it easy to distinguish commands from output.

[Autosniff — A Sniffer-Starting Daemon](#) • Ed Ravin

Autosniff will let your customers start a sniffer, record a trace of the problem, and mail you the results when the capture is complete.

[Linux Kernel Debugging](#) • Evan Sarmiento

Sarmiento examines methods of debugging the Linux kernel, using actual kernel bugs as examples.

[Recursive Use of SystemImager for Cloning Entire Clusters](#) • Scott Delinger

Delinger demonstrates how the SystemImager utility can be used to automate Linux installs in the construction of clusters.

[Visual Cron 2.1](#) • Chip Castle
